Subject: Microsoft Settlement

Dear Sir or Madam,

I feel that the proposed settlement with Microsoft does not go far enough. They should not get a free ride just because the judge said some things which lead some to question his impartiality. I am a conservative and usually against most anti-trust cases, but I believe that Microsoft has too much power. They are bullies. They steal good ideas from every other company in the industry, make an inferior version, and then use their power to eliminate the originators of the idea and force consumers to buy their inferior goods. If Microsoft is not weakened severely, they will continue to infect every aspect of the technological industry and bully the competition out of the market. Breaking up Microsoft's empire is imperative to the health of the tech industry, and therefore - the economy. Please do not group this case in with the rest of the trash from the Clinton Administration and Reno Justice Department. Go at them full bore.

Thank you,
Daniel J. Cragg
